

Some Possible Futures of Digital Helps for Bible Translators/Consultants

1. Cloud and/or offline access to UBS (and other) resources. These could be illustrations, maps, text (TBT, Handbooks, notes from various Bibles), videos-all indexed to words/verses in SLT and/or in other texts (see chart below). See: GLOW Bible (but also see the content), HypertextBible.org. Logos, TW, etc.
2. Wiki for TNE reference notes and user-contributed similar materials.
3. YouTube / User Forums for user-to-user help.
